

# Mentoring Across Cultures Masterclass:

Global Mentorship Initiative (GMI) invites current and prospective mentors to a special one-hour masterclass on "Mentoring Across Cultures." This event is designed to provide insights into the approaches that lead to successful mentorships, particularly in global and cross-cultural contexts.

Together, members of the GMI Team and the GMI Partner Network will share their experiences and perspectives on effective mentoring, focusing on three key areas:

- Teaching and learning approaches
- Cultural sensitivity
- Interpersonal dynamics

They will discuss how to understand and appreciate diverse backgrounds, build trust within mentorship relationships, maintain open communication, and create a safe environment for mentees to share their goals and challenges. Additionally, the masterclass will cover how to personalize mentorship styles to individual needs and identify resources to guide mentees through career challenges.

The session will conclude with a discussion and Q&A segment, featuring a GMI mentor from your organization, who will share their firsthand experience mentoring students from diverse backgrounds, and a GMI student, who will offer insights from the mentee's perspective.

The goal of this session is to equip participants with the tools and knowledge needed to foster successful and enriching mentorships and professional relationships across cultural boundaries. Attendees will gain practical advice for navigating intercultural nuances, building enriching personal connections with mentees, and enhancing the overall mentorship experience.

## Suggested Agenda:

- Interactive GMI Presentation on mentorship best practices – 30 minutes
- Discussion with a mentor and student - 20 minutes
- Q&A session with audience participation – 10 minutes
